

The Flowdown of US Government Contractual Provisions and Clauses to NPC Robotics Subcontractors

As a Contractor/subcontractor to the US Government (USG), NPC Robotics must comply with the Federal Acquisition Regulations (FAR) [See <https://www.acquisition.gov/browse/index/far>], Defense Federal Acquisition Regulations Supplement (DFARS) [See <https://www.acquisition.gov/dfars>] and any other Defense Logistics Acquisition Directive (DLAD) [See <https://www.acquisition.gov/dlad>] packaging, shipping, etc. requirements that are “attached” to an order. **These contractual requirements must be understood and those that are applicable met. A failure to do so has potential consequences.**

Various contract clauses are applied to each contract based on a number of criteria. Some of these criteria (in no particular) order are:

1. Clauses that apply to ALL contracts regardless of size (SOME EXAMPLES ARE: nondiscrimination, non-collusion, independent pricing determination(s), not currently debarred (which prevents you from doing business with the government), not currently having a federal tax liability, etc., etc., etc.).
2. The size (\$ value) of the contract (i.e., Micro-Purchase Threshold (currently \$10,000), Simplified Acquisition Threshold (currently \$250,000), etc.)
3. Whether the contractor is a sole-source provider of products
4. Whether the products provided are commercial (Governed by FAR Part 12)
5. Whether the products provided are non-commercial (Governed by multiple FAR Parts other than Part 12)
6. Etc.

Accordingly, all applicable contractual requirements must be “flowed-down” from the company that receives the contract to their subcontractors. The sub-contractors in turn must “flow-down” applicable contractual requirements to their sub-contractors, etc., etc. Theoretically, the requirements lessen at each level due to one or more factors (i.e., contract size diminishes, the sub-contracted item is commercial, the business size of the subcontractor is different than the contractor, etc.).

NPC Robotics, as a company that contracts directly with the USG, is required to register on the government’s System for Award Management (SAM) database and maintain that registration. SAM requires NPC to certify that we understand and comply with the complete list of clauses from FAR Part 52.204-7 through 52.204-13. **If you are a subcontractor of NPC that doesn’t contract directly with the USG you do not need to register with SAM.**

In any event, as a subcontractor to NPC who supplies items going to the USG you have the following obligations:

- Understand and comply with ALL applicable **Mandatory** FAR, DFARS and DLAD provisions and clauses
- Understand which **Conditional** FAR, DFARS and DLAD provisions and clauses apply to your company, when they apply and comply with them.
- Understand which clauses don’t apply and understand why they don’t apply.

Based on the applicability, nature and complexity of these clauses they all fall into three categories:

1. They do not apply (based on any number of factors).
2. They do apply and are easy to implement and comply with (with something as simple as a new or revised company policy).
3. They do apply but are more complex to implement and will require additional knowledge, resources, a project plan and/or time to comply. In addition there may be additional clauses referenced inside these clauses which significantly expand the nature and complexity of

The Flowdown of US Government Contractual Provisions and Clauses to NPC Robotics Subcontractors

compliance to them. OPSEC and ITAR are examples of clauses that fall into this category (and may not be the only ones).

As an example the following Mandatory & Conditional Provisions and Clauses are taken from the Defense Logistics Agency (DLA) Master Solicitation for Automated Simplified Acquisitions. **They provides a great starting point for your company’s compliance, with the mandatory clauses being a virtual certainty. Remember that the USG is constantly revising these requirements and it is your responsibility to stay up-to-date on the changes.**

[IMPORTANT NOTE: The “Master Solicitation” clauses referenced below have a Revision Date of December 9, 2019 (Rev-60). They are revised multiple times each year. Additionally each FAR, DFAR and DLAD clause has a revision Month and Year. Because they are subject to frequent revision it is critically important when determining compliance that the appropriate revision of the clause and/or document be used. This is not always the most recent revision.]

So what about **OPSEC** (Operational Security – The securing of information, information systems and your facility) and **ITAR** (International Traffic in Arms Regulations – Ensuring that exported products and information comply with USG export requirements)? These are both part of the aforementioned provisions and clauses or “Flowdowns”.

OPSEC is covered by the following clauses:

FAR 52.204-21 (Jun 2016) Basic Safeguarding of Covered Contractor Information Systems

DFARS 252.204-7008 (Oct 2016) Compliance with Safeguarding Covered Defense Information Controls

DFARS 252.204-7009 (Oct 2016) Limitations on the Use or Disclosure of Third-Party Contractor Reported Cyber Incident Information

DFARS 252.204-7012 (Oct 2016) Safeguarding Covered Defense Information and Cyber Incident Reporting

[OPSEC NOTE: Based on the USG’s desire to continuously improve, OPSEC is being reorganized into a “system” which is known as the Cybersecurity Maturity Model Certification or CMMC. The USG has expressed their intention to eventually audit all 300,000 estimated contractors and sub-contractors to its provisions. Currently CMMC has been released and as of March 18, 2020 it is at Version 1.2. It can be viewed here: https://www.acq.osd.mil/cmmc/docs/CMMC_ModelMain_V1.02_20200318.pdf

ITAR is covered by the following clauses:

DFARS 227.675-1 International Traffic in Arms Regulations

DFARS 252.225-7048 (Jun 2013) Export-Controlled Items

Defense Logistics Agency (DLA) Master Solicitation for Automated Simplified Acquisitions
